

# THE 2023 EXPERIENCE

## Cyber Security Superheroes

ATLSECCON is the premiere, non-profit security conference in Atlantic Canada with a focus on bringing some of the world's brightest and darkest minds together with one common goal - to expand the pool of IT Security knowledge beyond its typical confines.

Fighting the villains of cyber-attacks, and the threats they pose, requires understanding their motivation and techniques. With evolving technology, on-going remote work and cloud transformation, agility continues to be important in the IT industry.

ATLSECCON will provide a platform for the superheroes of cyber security to share the latest technologies to build a plan and roadmap, for the year ahead, to keep the villains at bay.
