

Ways To Connect

Making connections to build our community is an integral goal of the conference. The ATLSEC CON Board is steadfast in their position to commit to attendees that they will remain in control of their personal contact information, and choose when and how they share it.

Make it easy to share your name and contact information by creating a digital business card with a QR code. **QR Code Generator** is a free website that allows you to create a QR code containing the information you choose to share, without creating an account.

Click the link then choose "Contact" from the top menu:

<https://www.the-qr-code-generator.com/>

A unique QR Code will be generated on your screen that a receiving device can scan. Present your QR code for scanning to any attendee or tradeshow vendor, utilizing a smart phone, to share your contact information for contesting, prize draws or follow-up after the conference. We recommend adding #ASC23 to the "Fax" field to assist attendees and vendors in identifying conference connections amongst their contact list.

Happy Networking!
